

IMPERIALISM SELLING S.A. TO REDS

African moderator warns MRA conference

CAUX, Thursday.

Imperialism, both black and white, in South Africa was selling the country swiftly into the hands of Communism, said the Rev. G. Molefe, of Port Elizabeth, at the Moral Rearmament Summit Strategy Conference here yesterday.

Mr. Molefe is the first African to be appointed moderator of the Presbyterian Church of the Eastern Cape. He said, "The world's collapsing nations will clutch at any straw that offers hope of an answer. Africa is meant to be the continent that gives the answer.

"Her destiny is to be a God-led continent with a cure for the bitterness and imperialism of the black people, and the materialistic imperialism of the white people, but Africa can only reach this destiny if she rids herself of imperialism, hate, greed and ambition."

Mr. Molefe said, "We Africans have heard much about white imperialism and pride. So we sit back feeling comfortable and self-righteous. But I know, as a Bantu, that it is hate, bitterness and ambition which leads me to tread on other men to get where I want to, just as imperialistic as anything the white man has done in Africa.

DISUNITY

"We Africans have got to change," he said, "and take our full share of responsibility for the disunity and dirt in our continent."

Moral Re-armament was an ideology which cured greed and selfishness in human nature, whether it be in black or white.

Mr. Molefe said, "By that I mean the absolute application of our Christian faith. It gives every man and woman the choice and the chance to remake the world.

"Through Moral Re-Armament, both black and white have changed and have begun to make Africa the continent with the answer. Nothing but this ideology can save Africa from the vicious onslaught of Communism, which is out to destroy

our continent while it pretends to be helping us.

"The only ideology that can really save Africa is Moral Re-Armament," he said. "It united my family, it is uniting my nation and now it is providing the incorruptible ideological leadership that is fearlessly taking on the remaking of the world."—SAPA.
